

Dog Bin Update and stats

Background

Following councils decision on 23.01.24 **minute ref TC23/266d** Finance (Decision)
*It was **RESOLVED** to install a further 2 bins around the parish specifically at Wolverton Mill area to the north side of the balancing lakes (nearest to Stratford road) which would increase the weekly costs £416 to the contractual costs to £15184 (this would have minimal impact on the precept)*

I approached the Parks Trust following this decision, however they have since declined this offer for a bin near Stratford Road, they wish for the bin be placed near the gate opposite the bridge to Galley Hill, whilst within the parish boundary is used mainly by SSTC residents the Park Trust will now contact SSTC.

Current

Following reports from local residents of persistent issues with dog fouling in the area near to High Park Drive and Bengrove at Wolverton Mill, myself, our caretaker and the EEO attended site. The EEO found 70 separate areas of dog fouling and as a result we have identified two potential places of which we feel would be beneficial to site a new dog bin, which are:

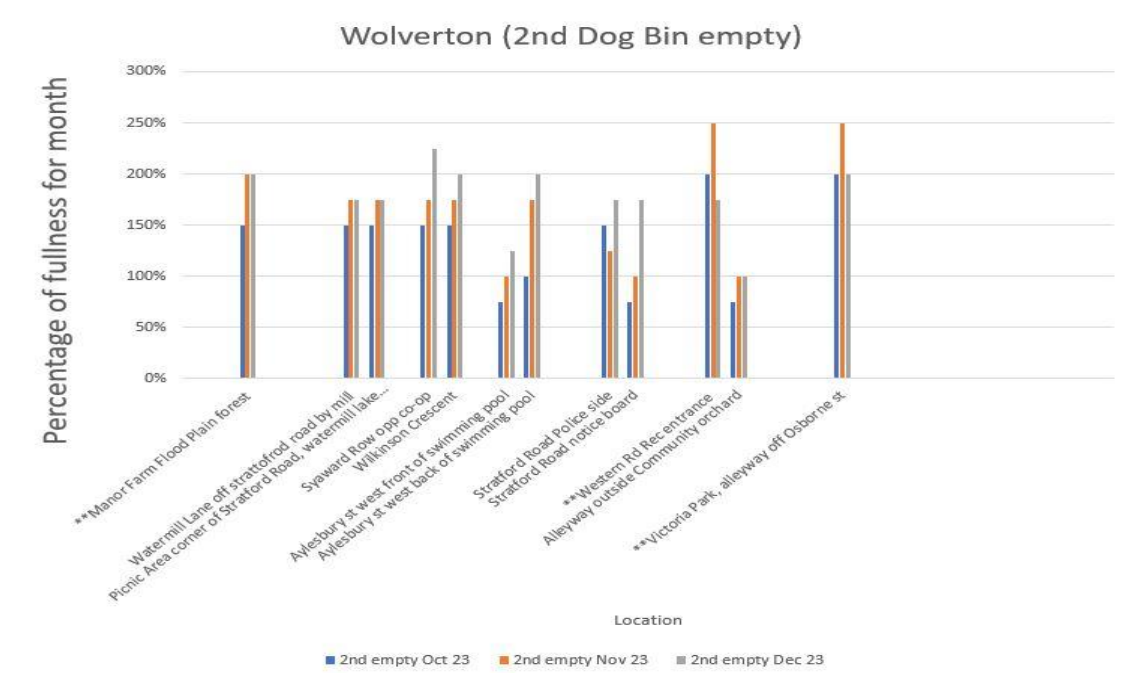

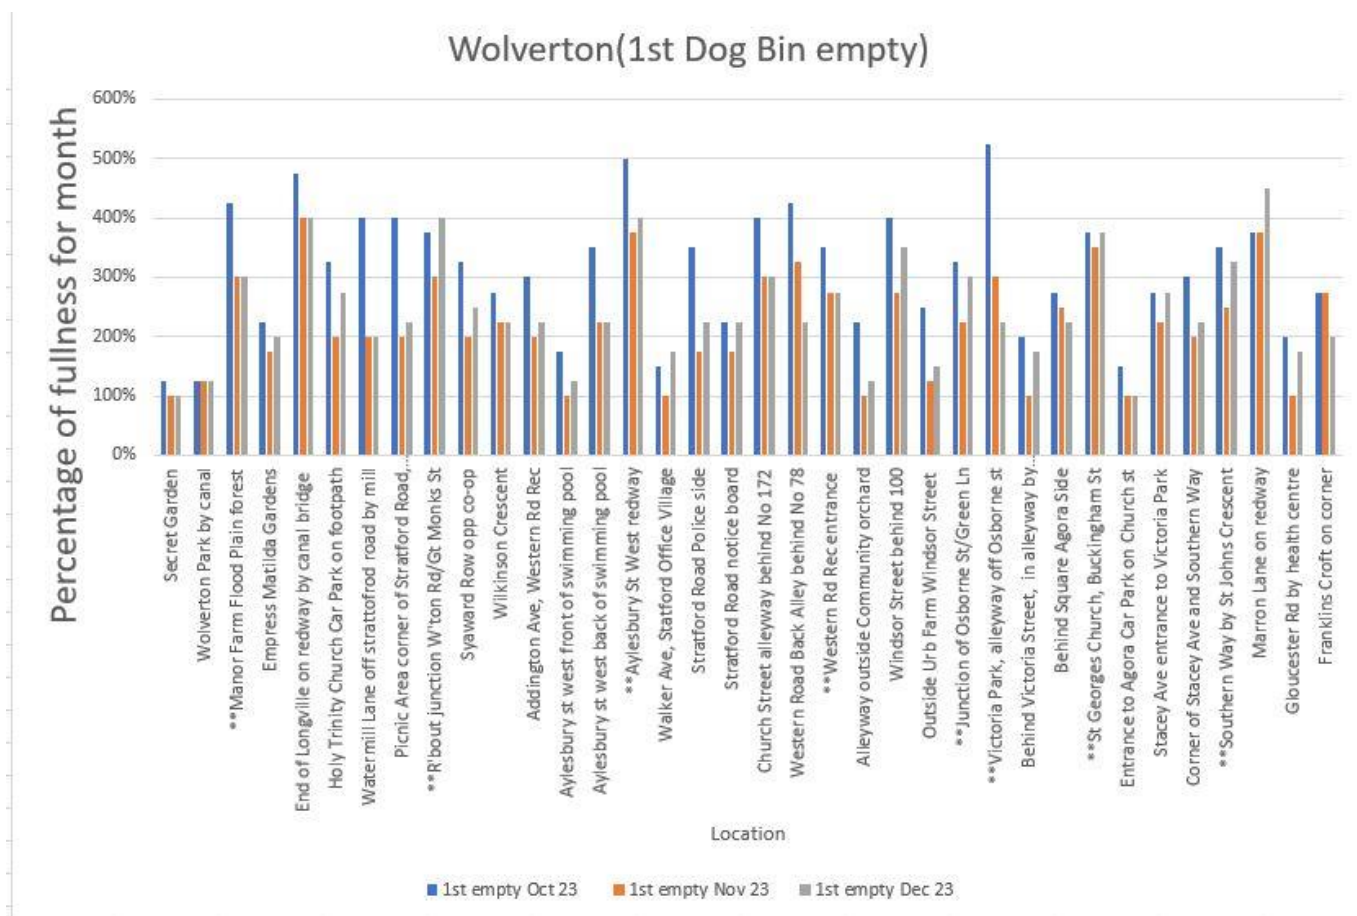

<https://w3w.co/status.reliving.rehearsal> or
<https://w3w.co/courier.dries.secures>

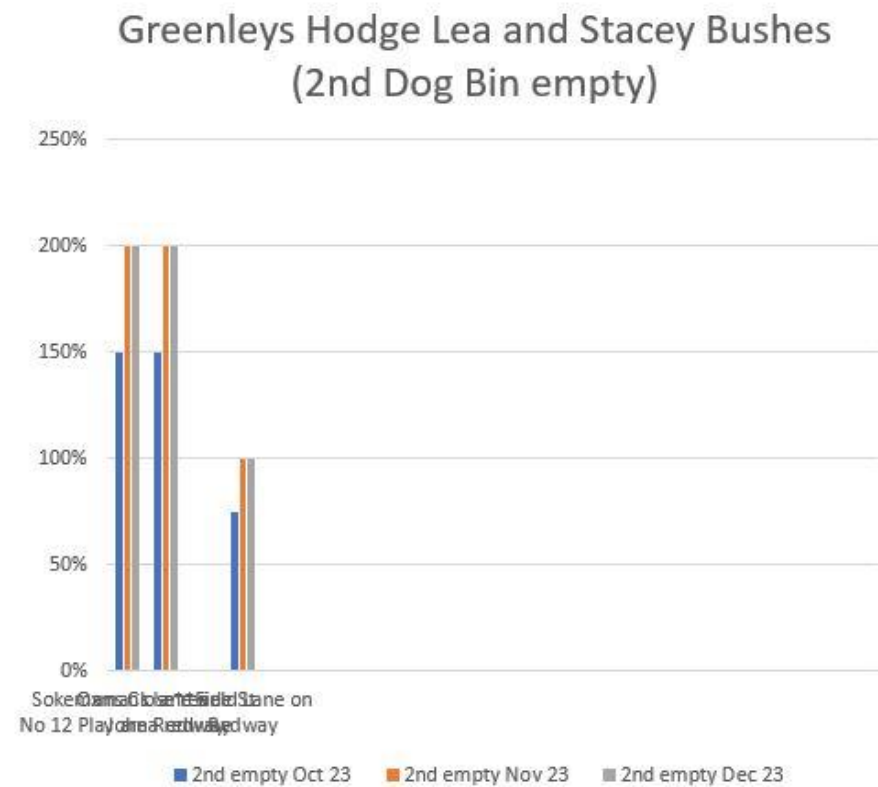

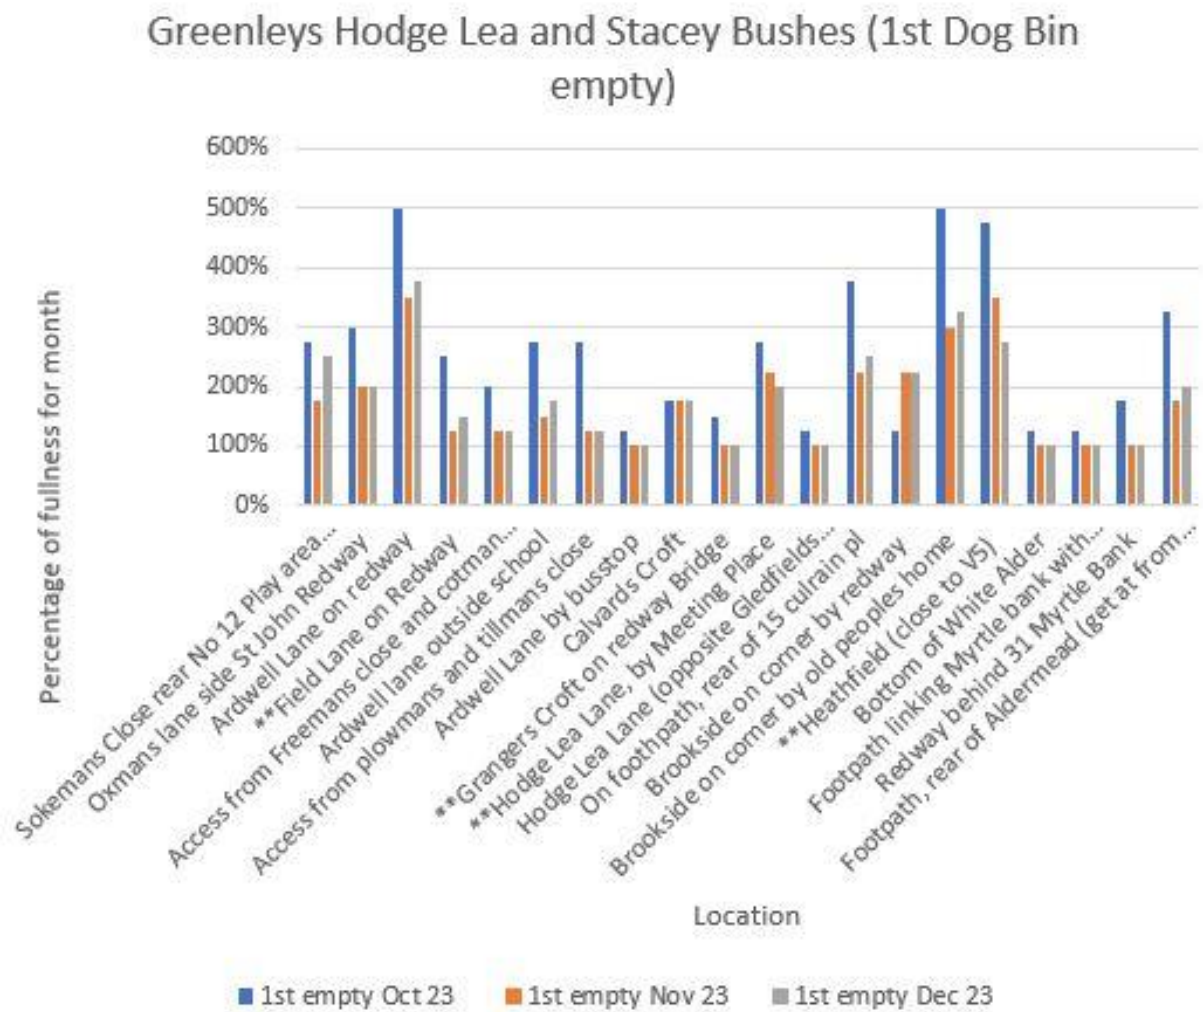

Again this is subject to whose land it belongs to and whether we can get the permission to install a post or they have to install on our behalf. I am currently pursuing this and will advise in due course

Stats on the following page:

The quarterly stats are as follows:

he larger bins that have been installed are doing their job and are full on collections Western Road and Victoria Park along with

Dog bin update to Full Council 28th February 2024

** indicates the bins that have bene upgraded to the 60ltr

Assistant Clerk 19th February 2024
